DETAILED ACTION

The examiner has considered the amendment and response filed by applicants on August 14, 2008. The rejections made in the Office Action dated February 14, 2008 have been withdrawn. The following rejections are now being made.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The definition of variables V and Z for the compound of formula AB are missing from the claim. Also, there is no R^{5'} substituent on the compound; therefore, the instant claim is rendered indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klar et al (WO 00/66589 [see U.S. equiv. 7,125,893]).

The instant claims are drawn to the preparation of an epothilone fragment of formula I by reacting a fragment of formula A with a fragment of formula B to form partial fragment AB, and then reacting AB with fragment C to form ABC (formula I).

Klar et al teach the same process, using the same process steps, and then teach cyclizing the ABC to produce a compound of instant formula II (see 7,125,893, col. 4- col. 5; col. 35 to col. 41, line 61). The difference between the instant claims and Klar et al is that the instant claim makes a compound of formula I and of formula II that are subgenres of the compounds made in Klar et al. The instant claims are rendered obvious because the artisan can readily select variables that would create species that would anticipate the instant claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-11 and 16-18 of U.S. Patent No. 7,125,893. Although the conflicting claims are not identical, they are not patentably distinct from each other because that the instant claim makes a compound of formula I and of formula II that are subgenres of the compounds made in Klar et al. The instant claims are rendered obvious because the artisan can readily select variables that would create species that would anticipate the instant claims.
